29th August 2024

TO WHOM IT MAY CONCERN

This is to certify that **Mr. Mihir Rauniyar** has been associated with Nepal Clearing House Ltd. (NCHL) since 29th October 2023 (12th Kartik 2080) as Associate-Infra/Tech at the time of his departure. He had joined Nepal Electronic Payment System Ltd. (NePS), which was acquired by NCHL on 3rd June 2024 (21st Jestha 2081).

Nepal Clearing House Ltd is a public limited company established and promoted by Nepal Rastra Bank (the central bank of Nepal), commercial banks, development banks and financial institutions to establish and operate national payment systems in Nepal. It currently operates Electronic Cheque Clearing (NCHL-ECC), Interbank Payment System (NCHL-IPS), Retail Payment Switch (RPS), retail channel (connectIPS), National Payments Interface (NPI), connectRTGS, CORPORATEPAY, EFT Card Services and National Payment Switch (NPS) with participation of almost all the BFIs and other institutions.

The last held position by Mr. Rauniyar at the company was Associate-Infra/Tech and he was given following responsibilities in line with organization's policies and procedures:

1. Backup and monitor Switch, Firewall, network devices and problems.
2. Installation and configuring OS and hardware in the Computers / Server / Printers.
3. Operation of AIX / Windows / Linux servers on Virtual Machine.
4. Troubleshooting problems for solving ATM / POS transaction through application.
5. Provide technical support on handling customer queries and complaints on Email or on call basis.
6. Knowledge on the Database and SQL queries.
7. Knowledge on information security and threats.
8. Able to work in team for handling pressure and division of works.
9. Handle issue effectively from across departments (Management, operation, Monitoring, Admin, HR).
10. Complete task status on time and update to Supervisor.

We wish all the success for his future endeavors.

Warm regards,

Munir Rajbhandari
Chief Operating Officer

Certificate of Course Completion

Mihir Rauniyar

has successfully achieved student level credential for completing the CCNA: Enterprise Networking, Security, and Automation course.

The student was able to proficiently:

- *Configure single-area OSPFv2 in both point-to-point and multiaccess networks.*
- *Explain how to mitigate threats and enhance network security using access control lists and security best practices.*
- *Implement standard IPv4 ACLs to filter traffic and secure administrative access.*
- *Configure NAT services on the edge router to provide IPv4 address scalability.*
- *Explain techniques to provide address scalability and secure remote access for WANs.*
- *Explain how to manage, optimize, monitor, and troubleshoot scalable network architectures and protocols.*
- *Explain how networking devices implement QoS.*
- *Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.*
